REASONS FOR ALLOWANCE

1. The following is an examiner's statement of reasons for allowance:

Claims 1, 3-8, 11, and 13 have been carefully considered with respect to applicant's argument filed on 9/16/2005 in view of the specification and the drawings of the invention. Claim 1 is written in terms of "a main circuit part", "a communication part", "a control circuit part", "a measuring part", and "a comparing part" with the configuration of the elements and its functions. A careful consideration is given with the interpretation with respect to the specification of the invention without importing the recited limitations into the claim. Claim 1 has been carefully considered according to applicant's argument that the Endo reference fails to teach or suggest the "a measuring part that measures an operating time of a system associated with said inverter", "a memory that stores a threshold value related to said operating time", and "a comparing part that compares a measured operating time measured by said measuring part with said threshold value, said condition data including a result of comparison by said comparing part". Claims 1, 3-8, 11, and 13 are patentable distinct from the references of the record.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
